InfoWorld honors Openbravo with Best of Open Source Award 2009

Fri Sep 4, 2009 9:36am EDT

- Openbravo and its community recognized with Bossie award on heels of new innovative products and broadened range of applications -
BARCELONA, Spain & CAMBRIDGE, Mass.--(Business Wire)--
Openbravo, the leading developer of web-based open source Enterprise Resource Planning (ERP) and Point of Sale (POS) solutions for businesses, has been named by InfoWorld as the `Best of Open Source Enterprise Software` in IDG`s 2009 InfoWorld Best of Open Source Software (Bossie) Awards.

The Bossie awards celebrate the best open source products for business, including enterprise software, developer tools, networking software and platforms and middleware.

The article stated that "Openbravo impresses with a well-developed point-of-sale solution, procurement and warehouse management tools, financial and accounting features, and production logistics for shop floor oversight. Further, Openbravo's plug-in architecture offers the same sort of extensive modularity found in SugarCRM and traditional commercial applications from the likes of SAP and Oracle. That means your developers can extend system functionality without worrying about stepping on core functionality. And the entire Openbravo system is supported by a healthy set of alerts, role-based user provisioning and access control, and a good Web-based UI."

Openbravo has launched several new products and added extensions to existing products over the past year. New products include Openbravo QuickStart and Openbravo Professional Subscription for Ubuntu. QuickStart is a recently announced simplified ERP solution for small and medium businesses that optimizes the management of sales, inventory, procurement and accounting. It is fast to implement, only requiring between 40-80 hours of fixed price services before it`s up and running. Openbravo Professional Subscription for Ubuntu provides expert support and business continuity for the entire open source software stack, which includes Openbravo ERP software, the Ubuntu operating system, application server and database.

Another key initiative for Openbravo, which paved the way for its QuickStart product, was the launch of Openbravo Forge, a central hub for project development, bringing its entire community together. In the Forge, the community can develop applications on top of Openbravo. Examples of applications recently listed include mBravo, a mobile version of Openbravo for Android, and Mobile Alerts allowing for SMS alerting, among others.

Manel Sarasa, CEO of Openbravo, said, "It`s great for our team and community to be recognized by leading experts such as InfoWorld and IDG. The award recognizes the comprehensive functionality, the innovative architecture and unbeatable cost effectiveness of our products. Companies adopting Openbravo know they choose a well known solution that will drive their business and they are supported by a global community that is tearing down old barriers and changing the rules of the game."

Openbravo previously won a Bossie in 2007 when Openbravo ERP was recognized in "Best of Open Source Applications".

[About InfoWorld Media Group](#)

InfoWorld Media Group helps IT Decision Makers choose the right technology, within the context of a cohesive strategy for business impact at their organizations. InfoWorld identifies and promotes emerging technology segments that add unique value for the organizations that implement them, as well as the vendors that provide those solutions. Using an integrated communications approach including online, events, research, and a continued investment in an independent Test Center, InfoWorld analysts and editors provide hands-on analysis and evaluation, as well as expert commentary on issues surrounding emerging technologies and products.

[About Openbravo](#)

Openbravo is an award-winning developer of professional open source solutions for businesses, offering the industry's first real alternative to proprietary software. The company's web-based Enterprise Resource Planning (ERP) and Point of Sale (PoS) solutions, the most popular in their market, have been downloaded more than a million times and are used in over 50 countries.

Openbravo's growth is fueled by an ever expanding international community of users, partners and developers. The company's commercial open source business model eliminates software license fees, providing support, services, and product enhancements via an annual subscription.

Openbravo is venture backed and has received record funding in the Open Source ERP space from Amadeus Capital Partners, GIMV, Adara Venture Partners and Sodena.
